

## 10 Questions To Ask Yourself Before Performing A Network Infrastructure Assessment

1. Do you lack visibility into your infrastructure?
2. Is your IT department a cost center or strategic advantage?
3. Are you facing the possibility of having to upgrade your bandwidth to meet traffic demands?
4. Do you need assistance in building business cases for a needed infrastructure upgrade?
5. How do you get more from less?
6. What considerations should you make when contemplating an offsite, hosted solution?
7. Has security and usability become exclusive in your organization?
8. Are you currently capable of validating solutions in-house?
9. Do you find yourself solving for today and sacrificing tomorrow?
10. Do you want the confidence to tell your C-level executives that your infrastructure is prepared to add value to the organization?
